

Math Showcase Resource - Math Aids

Resource: [Math Aids](http://math-aids.com) - <http://math-aids.com>

Description:

Math Aids is a **dynamic** and **random worksheet** generator. Using this resource teachers, students, and parents can pick a mathematical topic such as graphing, algebra, integers, factors, percents and word problems and create a unique, customized worksheet. Customizable features for each handout can include: language, memo line, amount of data given to solve a problem, currency, format, as well as the type of questions. Since Math Aids is a random worksheet generator multiple versions of the same handout can be created - same formatting and customizable features just with different questions/numbers. This is a free resource with no limitations; an unlimited number and variation of worksheets can be created at no cost.

How To:

1. Go to <http://math-aids.com>
2. Select topic on the left hand navigation
3. Select any customization options available (e.g. language, answer key, topic specific)
4. Click "Create It"
5. Save or download PDF files generated

Usefulness:

Teachers can present students and parents with this resource. Students could then use Math Aids to generate **practice problems** to help them study. With the unlimited number of uniquely generated worksheet, the student can practice until they feel comfortable with the material; preparing themselves for upcoming tests and exams.

This resource will be a great **time saver**. With Math Aids teachers do not have to create their own worksheet. Choosing the question, wording the instruction, formatting, and creating multiple versions of a given worksheet is taken care of with this tool.

Many teachers create **multiple versions** of test to discourage cheating. This can be a very time consuming process; however, with Math Aids an endless version of the same worksheet can be created in a matter of seconds.

Another great feature of this resource is that with each worksheet generated an **answer key** is created. This saves time and makes marking significantly easier, especially if multiple versions of the worksheet/test is created.

Unlike many handout generating software, Math Aids is a completely free tool - no 30 day free trial, no paying extra for additional features - **completely free!**
